LIMITED WARRANTY AND DISCLAIMER OF LIABILITY

ACADEMIC PRESS, INC. ("AP") AND ANYONE ELSE WHO HAS BEEN INVOLVED IN THE CREATION OR PRODUCTION OF THE ACCOMPANYING CODE ("THE PRODUCT") CANNOT AND DO NOT WARRANT THE PERFORMANCE OR RESULTS THAT MAY BE OBTAINED BY USING THE PRODUCT. THE PRODUCT IS SOLD "AS IS" WITHOUT WARRANTY OF ANY KIND (EXCEPT AS HEREAFTER DESCRIBED), EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTY OF PERFORMANCE OR ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. AP WARRANTS ONLY THAT THE MAGNETIC DISKETTE(S) ON WHICH THE CODE IS RECORDED IS FREE FROM DEFECTS IN MATERIAL AND FAULTY WORKMANSHIP UNDER THE NORMAL USE AND SERVICE FOR A PERIOD OF NINETY (90) DAYS FROM THE DATE THE PRODUCT IS DELIVERED. THE PURCHASER'S SOLE AND EXCLUSIVE REMEDY IN THE EVENT OF A DEFECT IS EXPRESSLY LIMITED TO EITHER REPLACEMENT OF THE DISKETTE(S) OR REFUND OF THE PURCHASE PRICE, AT AP'S SOLE DISCRETION.

IN NO EVENT, WHETHER AS A RESULT OF BREACH OF CONTRACT, WARRANTY OR TORT (INCLUDING NEGLIGENCE), WILL AP OR ANYONE WHO HAS BEEN INVOLVED IN THE CREATION OR PRODUCTION OF THE PRODUCT BE LIABLE TO PURCHASER FOR ANY DAMAGES, INCLUDING ANY LOST PROFITS, LOST SAVINGS OR OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PRODUCT OR ANY MODIFICATIONS THEREOF, OR DUE TO THE CONTENTS OF THE CODE, EVEN IF AP HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, OR FOR ANY CLAIM BY ANY OTHER PARTY.

Any request for replacement of a defective diskette must be postage prepaid and must be accompanied by the original defective diskette, your mailing address and telephone number, and proof of date of purchase and purchase price. Send such requests, stating the nature of the problem, to Academic Press Customer Service, 6277 Sea Harbor Drive, Orlando, FL 32887, 1-800-321-5068. APP shall have no obligation to refund the purchase price or to replace a diskette based on claims of defects in the nature or operation of the Product.

Some states do not allow limitation on how long an implied warranty lasts, nor exclusions or limitations of incidental or consequential damage, so the above limitations and exclusions may not apply to you. This Warranty gives you specific legal rights, and you may also have other rights which vary from jurisdiction to jurisdiction.

THE RE-EXPORT OF UNITED STATES ORIGIN SOFTWARE IS SUBJECT TO THE UNITED STATES LAWS UNDER THE EXPORT ADMINISTRATION ACT OF 1969 AS AMENDED. ANY FURTHER SALE OF THE PRODUCT SHALL BE IN COMPLIANCE WITH THE UNITED STATES DEPARTMENT OF COMMERCE ADMINISTRATION REGULATIONS. COMPLIANCE WITH SUCH REGULATIONS IS YOUR RESPONSIBILITY AND NOT THE RESPONSIBILITY OF AP.

Acknowledgments

The outline for this book was generated by Christopher D. Watkins and Stephen R. Marenka. The technical text and figures were written and created by Christopher D. Watkins, while the vast writing of the general text was done by Stephen R. Marenka. Vincent Mallette of the Georgia Institute of Technology made gross contributions to the human perception chapter of this book, with the research assistance of Alice Merta and Cassandra Jeffries. Christopher D. Watkins is totally responsible for the labour of birth for all of the software found with this book. Some proofing of the manuscript, as well as compilation of profiles for companies and universities involved in virtual reality products and research, was done by Christina N. Noland.

All of the software in this book was written in C using Borland C++ version 3.1. The Borland C++ software was furnished by Borland International, 1800 Green Hills Road, Scotts Valley, CA 95066.

Thanks also to WATCOM of 415 Phillip Street, Ontario, Canada, N2L 3X2 for supplying the WATCOM compiler version 9.5.

Thanks go to director Michael Sinclair of the Georgia Institute of Technology Multimedia Technology Laboratory for supplying images of the Eye Surgery Simulator, of the Motion Interactive System for sports, and of the three-dimensional scanner output.

Thanks go to Paul Kingston and Schelly Weedman of IVEX Corporation for information and images regarding the IVEX Visual System for Flight Simulation. IVEX Corporation designs, manufactures, and markets a series of high-performance visual simulation systems for use in civil and military training markets. Their systems distinguish themselves from others in that the overall reality of the visual scene is greater. This “reality” is primarily achieved using fractual texturing methods and high polygon counts for detail. IVEX Corporation is located at 4355 International Blvd., Norcross, GA 30093.

Thanks go to director James D. Foley, Larry Hodges, and Tom Meyer of the Georgia Institute of Technology College of Computing Graphics, Visualization & Usability (GVU) Center for the remainder of the images found throughout the book and for their contributions regarding virtual reality research.

Thanks go to Thomas Morley of Georgia Institute of Technology for supplying information on mass-spring systems.
Thanks to John Poulton and Linda Houseman of the University of North Carolina at Chapel Hill for their contributions regarding their research into virtual reality.

Thanks go to Ken Welton and Michael Glaser of Lavista Systems, Inc., Tucker, Georgia for supplying equipment necessary for the completion of this book.

Thanks to Jordan Hargrave for supplying us with the BGI graphics drivers found along with the software. The drivers are copyright Jordan Hargrave.

Thanks to Jack Brady of Southeastern Digital Images, Inc. and C/Food Software, Atlanta, for acting as a sounding board for ideas.

Thanks go to Jack Tumblin for his brainstorming regarding three-dimensional computer graphics techniques.

Thanks go to Stephen B. Coy for his help in obtaining information on algorithms for polygon filling and for his brainstorming on three-dimensional computer graphics techniques.

Thanks go to Adam Schiffman of The Graphics Alternative for production of his copyrighted image "silver surfers" found on the front cover of this book. The Graphics Alternative consults for 3D Animation, 2D Imaging, and Video. The Graphics Alternative is located at 190 El Cerrito Plaza #107, EL Cerrito, CA 94530, and TGA can also be contacted by voice at 510-528-1652 or BBS at 510-524-2780.

Thanks go to Mitch Kolbe of 34 W. Orange Street, Tarpon Springs, Florida for providing the photorealistic paintings used as texture maps. Mr. Kolbe has worked on such projects as one of America's largest murals, The Cyclorama, which depicts the Civil War in Atlanta in 1864. Several projects followed the completion of The Cyclorama; these included museum background murals, which required molding, casting, and fiberglass sculpture, as well as work for the U.S. Fish and Wildlife Service, Epcot Center, and Disney World. Since 1985 Mr. Kolbe has been fully dedicated to the creation of fine art oil paintings. He presently resides in the original studio of the famous artist George Innes Jr. in Tarpon Springs, Florida.

Algorithm, Inc. of 3776 Lavista Road, Suite 100A, Atlanta, GA 30084 produces tools for ray tracing, volume rendering, 3-D modeling and VR, animation, image processing, and interactive image warping and morphing. Contact us at the above address or call/fax (404) 634-0920 for more information regarding our products.

And special thanks again go to our parents, wives, and friends for their love and patience with us during this project.
And, as always, much thanks again to the Coca-Cola Company and to the Jolt Cola Company for providing Cola and to Snapple for providing tea to keep us awake long enough to complete this project.
